Natural Vegetation

• Social forestry - It is the awareness regarding conservation of forest and to meet the needs of the ~~full~~ people regarding fuel and timber.

→ Aim:

- To remove pressure from the forest
- Planting of trees in and around agricultural fields, railway lines, side of some rivers.
- Providing the common man with timber, fodder for cattle etc., thereby protecting forest.

→ Advantages of Agroforestry:

- Provides long term economic stability.
 - Reduces pollution and global warming.
-
