## 1. What is HTML?

HTML (HyperText Markup Language) is used to structure web pages. It defines elements like headings, paragraphs, links, and images.

## 2. HTML Structure

```
<html>
<head>
<title>My Page</title>
</head>
<body>
<h1>Hello World</h1>
</body>
</html>
```

## 3. Important Tags

<h1> to <h6>, <p>, <a>, <img>, <ul>, <ol>

## 4. Forms

```
<form>
<input type='text'>
<button>Submit</button>
</form>
```

## 5. Mini Project

```
<html>
<body>
<h1>My Website</h1>
<p>Welcome</p>
</body>
</html>
```

## 6. Interview Questions

What is HTML? What is tag? What is attribute?
