

# BASICS OF COMPUTER

---

## 1. What is computer?

- **Computer is an electronic device which can store and manipulate data.**
  - **It can solve arithmetical and logical problem without any error.**
- 

# Full form of COMPUTER

**Commonly  
Operating  
Machine  
Purposely  
Used for  
Technological and  
Educational  
Research**

**Calculate  
Operating  
Memory  
Printing  
Update  
Tabulate  
Edit  
Response**

# What is Data?

- Anything which can be stored into computer, known as data.
- Data is the collection of unorganized facts which can include numbers, images, texts, or sound.
