

Complete Full Stack Development Roadmap:

There are many frameworks for full stack but don't confuse yourself , MERN gets your job done and it is great for projects.

Therefore the frameworks we will use are as follows:

1. Frontend -> React.js
2. Backend -> Node.js + Express.js
3. Database -> MongoDB

Now let's make a roadmap week by week and master Full Stack in 2 months.

- Week 1 – HTML + CSS

Resources:

HTML and CSS - <https://www.youtube.com/watch?v=G3e-cpL7ofc>

CSS Flexbox and grid -

<https://www.youtube.com/watch?v=3eIGSZSWTbM>

After this practice:

- > Clone a simple landing page
- > build a portfolio page

- Week 2 - Advanced CSS + Tailwind

Resources:

Tailwind CSS Crash Course -

<https://www.youtube.com/watch?v=dFgzHOX84xQ>

CSS animations - <https://www.youtube.com/playlist?list=PL4-IK0AVhVjP5iRPyoF1pKwX-7sEOwty4>

- Week 3 & 4 – JavaScript (Core + DOM)

Resources:

JavaScript full course - <https://www.youtube.com/watch?v=EerdGm-ehJQ>

Concepts to master -> Variables, functions, arrays and objects, ES6, DOM manipulation, Fetch API

Practice -> To Do App, Weather app using API, Quiz App

- Week 5 – Git + GitHub

Resources:

Git & GitHub Crash Course –

<https://www.youtube.com/watch?v=vA5TTz6BXhY>

After completing this, you should start practicing pushing your projects that you made till now or try to work in group with your friends.

- Week 6 – Node.js + Express

Resources:

Node & Express Full Course –

<https://www.youtube.com/watch?v=Oe421EPjeBE>

Practice this-> Build a simple REST API

Connect it with your frontend

- Week 7 – Database (MongoDB)

Resources:

MongoDB crash course -

<https://www.youtube.com/watch?v=2QQGWYe7IDU>

After this practice building a CRUD app with database.

- Week 8 – Authentication + Deployment

Resources:

JWT Authentication -

https://www.youtube.com/playlist?list=PLZIA0Gpn_vH9yI1hwDVzWqu5sAfajcsBQ

For deployment -

React → Deploy on Vercel

Backend → Deploy on Render

Full MERN App → Connect backend URL + frontend live site

After this you are good to go. Make one project only but make in such a way that you understand each and every line of code and every step.

You've got this.
