

Librarika - Cloud-Based ILMS

What is Librarika?

What is Librarika?

Librarika is a cloud-based, web-based Integrated Library Management System (ILMS) used to manage library collections, members, cataloguing, circulation, and the online catalogue (OPAC).

In Simple Words

Librarika is an online library management system that helps a library organise its collection, manage members and circulation, and provide an online catalogue.

Librarika - Cloud-Based ILS

Simple, Hosted Library Management

What is Librarika?

Librarika is a cloud-based ILS that helps libraries catalogue collections, manage circulation, and publish an Online Public Access Catalog (OPAC). Fully hosted - nothing to install or maintain, updates delivered automatically.

Who Operates Librarika?

Operated by Raynux Pty Ltd (ABN 38 700 717 166), Australian company based in Perth, WA. Raynux has taken over operation, service continues as before, data and account carry over unchanged.

Built to be Simple

Many small and medium libraries find traditional systems difficult to install and maintain. Librarika removes that burden, so librarians focus on collections and members.

Pricing

Free for up to 2,000 titles or records. Larger collections via paid plans. Higher allowances for eligible non-profit and charitable organisations.

Librarika - The Free Integrated Library System

Open a Free Library - Start Managing Your Books

What is Librarika?

The free integrated library system - ILS. Cloud-based, fully hosted, nothing to install.

Open a Free Library

Create your free library instantly. Start managing your books, members and circulation. Free up to 2,000 titles.

How to Start?

Explore Home, Features, Plans, Articles, Discover, FAQs. Click Create Library or Create Free Library, then View All Features and start.

Who Uses Librarika?

Scales from Classroom to Institution

Who Uses Librarika?

Librarika suits wide range of libraries - from universities, colleges and schools to public, corporate, community and personal collections - and is used by organisations in many countries. Whether managing single classroom collection or institutional library, Librarika scales to suit.

Cataloguing & Data Enrichment

To make cataloguing faster, Librarika can automatically retrieve cover images and bibliographic information from range of established sources, so records created with minimal manual effort. We gratefully acknowledge Open Library project, initiative of Internet Archive, whose open cover-image API is among sources we draw on.

Librarika - Powerful Integrated Library System

Features to Enhance Customer Experience

Librarika is a powerful ILS designed to enhance customer experience and make library management efficient and effective.

Catalog Management

Organize and manage entire library collection efficiently.

Built-in OPAC

Provide seamless access to your library catalog and resources.

Smart Add

Instantly add books using ISBN from the Internet.

Bulk Import

Efficiently import large number of catalog items in bulk.

Export Catalog

Export catalog items for external use or backup.

Biblio Data Integration

Seamlessly integrate bibliographic data with OpenLibrary.

Librarika Benefits

Why Libraries Love Librarika

Free Forever

100% free for up to
2000 titles
or records.

Instant Creation

Instant creation of
your online library
at Librarika.

Unlimited Members

Unlimited member
/ patron accounts.

Smart Services

Member reservation
/ self-service /
overdue reminders.

Barcode Friendly

Barcode scanner
friendly.

Zero Hardware Cost

No hardware,
infrastructure and
software cost.

Zero Maintenance

No installation and
maintenance cost.

Easy to Use

Easy, no technical
skill required.

Access Anywhere

Access from anywhere
using any internet-
enabled device.

Multi-Branch

Support multiple
library branches.

Librarika Benefits | Free | Unlimited | Barcode | No Cost | Anywhere | Multi-Branch

Librarika - Built-in OPAC

Online Public Access Catalog for Members

What is Built-in OPAC?

OPAC is built-in with all Librarika libraries. That means your library members can search through your library catalogs, book library materials and share with others.

Search Catalogs

Members can search through your library catalogs quickly and easily.

Book Materials

Book library materials online with reservation and self-service.

Share with Others

Share library materials and collaborate with others seamlessly.

Librarika - Cost Effective ILS

The Most Cost Effective Integrated Library System

Why Cost Effective?

Librarika is the most cost effective integrated library system (ILS). No hardware cost, no expensive software to buy, no installation and maintenance burden and its safe and secure.

No Hardware Cost

No hardware, infrastructure cost - fully hosted in cloud.

No Expensive Software

No expensive software to buy - free up to 2000 titles.

No Maintenance Burden

No installation and maintenance burden - updates automatic.

Safe & Secure

Safe and secure - data protected, reliable cloud hosting.

Librarika Cost Effective | No Hardware | No Software Cost | No Maintenance | Safe Secure | Cloud Hosted

Librarika - Unlimited Members

No Boundary - Add Any Number of Members

Unlimited Members

With Librarika, you can add any number of library members to fit your needs. Our intuitive user management module lets you manage all users smartly and easily. There is no boundary.

Any Number

Add any number of library members to fit your needs - no limits.

Intuitive Management

Intuitive user management module lets you manage all users smartly.

Manage Easily

Manage all users smartly and easily with simple tools.

No Boundary

There is no boundary - unlimited growth for your library.

Librarika - Simple & User-friendly

Smart, Intuitive, No Technical Skill Required

Simple & User-friendly

Librarika interface is simple, smart, intuitive and very user friendly. No additional technical skill is required to use Librarika. So, it will also save training cost and time for library staff.

Simple

Simple interface -
clean, easy to navigate
for everyone.

Smart & Intuitive

Smart, intuitive design -
understand quickly
without confusion.

No Tech Skill

No additional technical
skill is required to use
Librarika.

Saves Training Cost

Save training cost and
time for library staff -
ready to use.

Librarika - Multiple Branches

One ILS for All Geographical Locations

Multiple Branches

Librarika supports multiple branches spanning logically or physically into different geographical locations. So, you do not have to install or manage separate integrated library system (ILS) for each of your library branches.

Multiple Branches

Supports multiple branches spanning logically or physically.

Different Locations

Different geographical locations managed from one system.

Single ILS

No need to install or manage separate ILS for each branch.

Unified Management

Manage all branches centrally - save cost, time and effort.

Librarika - Hold Queue

Automated Queue Management with Pickup Notifications

Hold Queue

Members can place holds on checked-out items.
Automated queue management with pickup notifications.

Place Holds

Members can place holds on checked-out items easily.

Automated Queue

Automated queue management - first in first served.

Pickup Notifications

Pickup notifications when held items become available.

Auto Fulfillment

Automatic fulfillment when items are returned to library.

Librarika - SSO Integration

Single Sign-On with Your Institution Identity Provider

SSO Integration

Single Sign-On integration with your institution's identity provider.

Single Sign-On

Single Sign-On - one login for all services.

Institution Identity

Integration with your institution's identity provider.

Secure & Seamless

Secure and seamless access for students and staff.

Unified Access

No multiple passwords - unified access to library system.

Librarika - SIP2 Protocol

Standard Interchange Protocol 2.0 - Connect Automation Devices

SIP2 Protocol

SIP2 (Standard Interchange Protocol) is an industry-standard protocol developed by 3M that enables communication between library automation devices and your library management system.

Self-Service Kiosks

Connect self-service kiosks directly to Librarika library system.

RFID Systems

RFID systems integration for automated check-in checkout.

Automation Devices

Connect automation devices and book drops via SIP2 protocol.

Third-Party Hardware

SIP2 integration for third-party library hardware and devices.

Librarika - MARC Import

Librarika Kiosk - Key Features

Everything Patrons Need, Right at the Kiosk

Self-Checkout & Checkin

Patrons borrow and return items independently with instant confirmation and due dates.

Barcode Scanner Support

Works with any USB barcode scanner in keyboard-emulation mode. Plug and scan.

Patron Status View

See checked-out items, overdues, and fines at a glance.

Kiosk / Fullscreen Mode

Lock into fullscreen for public deployment with shortcuts disabled.

Receipt Printing

Print receipts using system printer, including POS and serial printers.

Auto-Logout

Sessions end automatically after inactivity, clearing patron data.

Cross-Platform

Use hardware you already have. No special kiosk equipment required.

Privacy & Audit

Session data cleared on logout. All events logged locally for audit.

Librarika Kiosk - How It Works & Download

Simple Enough for Any Patron Without Training - 4 Steps

1 Scan Library Card

Patron scans card barcode or types number.

2 View Account

Current checkouts, overdues, fines displayed.

3 Scan Items

Scan each item to check out/return. Instant confirmation with due date.

4 Logout

Patron logs out or session ends automatically. Done!
